Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaczmarski et al. (5,974,706).

Kaczmarski et al. discloses a demolition equipment system including a plurality of separate and distinct equipment basis including a bucket and a plurality of separate and distinct claw tines as described in col 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-8, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaczmarski et al. (5,974,706) in view of Kirkpatrick et al. (6,155,619).

Kaczmarski et al. discloses a demolition equipment system as described previously, but lacks specifying the number and position of the tines.

Kirkpatrick et al. teaches that it is known in the art for grapples to use a multitude of tines including 3, 4 or 5 tines which would inherently be placed at a variety of positions depending on how many tines are used since tines are evenly spaced.

Concerning claim 11, it would have been obvious to one of ordinary skill in the art at the time the invention was made to form the demolition equipment system of Kaczmarek et al. as modified by Kirkpatrick et al. with the claimed claw rotation range of at least 75 degrees, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art (see MPEP 2144.05).

Allowable Subject Matter

Claims 9,10,12,15-34 are allowed.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
